

Cassey Dunstall

Consultant

Cassey is a Consultant with Watson & Associates in the school board accommodation and financial planning division of the firm. Her expertise encompasses data management, modeling and research in demographics and pupil enrolment forecasting. Her analysis is critical to two of the firm's major client service areas – the preparation of long term accommodation plans and education development charge background studies for Ontario school boards.

Cassey joined Watson & Associates in September, 2003 after seven years as a researcher with the Nova Scotia Department of Education – Research and Statistics Division. Her experience in this position, which included data management of spatial education data for the department, creating a database to aid in the verification and collection of student and enrolment data, allows her to understand the integration of student enrolment projections with the assessment of long term capital expenditure and program needs, including the requirement to acquire school sites to serve enrolment growth.

Cassey holds a Bachelor of Arts degree in Geography from Wilfrid Laurier University and a post-graduate diploma in GIS – Application Specialist from Sir Sandford Fleming College. She is also a member of the Council for Education Facilities Planners International (CEFPI).
